Phone: (+1)-510-423-1353

ADDRESS

Gates Computer Science 254,
Stanford University,
Stanford, CA 94305.

Education

University of California, Berkeley Doctor of Philosophy in Computer Science Advised by Michael I. Jordan and Martin J. Wainwright	2011 - 2016
University of California, Berkeley Master of Arts in Statistics	2011 - 2013
Tsinghua University Bachelor of Engineering in Computer Science Supervised by Andrew C. Yao	2007 - 2011

Employment

Post-doc Researcher at Stanford University Hosted by Percy Liang and Moses Charikar	2016 - Now
Intern at Baidu Project: burst detection in web search	Winter, 2015
Intern at Microsoft Research Redmond Project: convex optimization	Summer, 2014
Intern at Google Mountain View Project: personalized recommender systems	Summer, 2013
Intern at Microsoft Research Asia Project: click modeling for web search and online advertising	2010 - 2011

Selected Awards & Honors

2017	Best Paper Award, Conference on Learning Theory (COLT).
2016	Outstanding Reviewer Award, International Conference on Machine Learning (ICML).
2015	Baidu Fellowship (awards 8 PhD students every year worldwide).
2013	Microsoft Research PhD Fellowship Finalist.
2011	Outstanding Undergraduate Dissertation Award, Tsinghua University.
2006	Silver Medal in Asian Physics Olympiad.
2006	Gold Medal in Chinese Physics Olympiad (5 th among 400,000 participants).

Research Projects

My research interest lies in the field of *artificial intelligence*. My past projects spanned machine learning, natural language processing and statistical methods. They consist of new algorithms, fundamental theory and practical software. Below is a list of projects that I have been working on (with publication references):

Natural language processing

- Semantic parsing for question answering systems [C1].

- Efficient algorithm for parsing natural language into executable logical forms.
- Impact: 11x-16x faster and 13% more accurate than the state-of-the-art parser.

Machine learning and optimization

- Deep learning and non-convex optimization [C2,C3,C4,C5,C6].
 - Algorithms for non-convex optimization (with applications to deep learning).
 - Impact: stronger theoretical guarantee and improved empirical performance on DNN/CNN/LSTM.
- Convex optimization [J1,C9].
 - Efficient algorithm for convex optimization.
 - Impact: orders-of-magnitude faster convergence than SGD in theory/practice.
- Crowdsourcing [J5,C10].
 - Algorithm for estimating the true labels from noisy crowdsourced data.
 - Impact: first algorithm to guarantee the best possible statistical accuracy.
- Personalized recommender systems [C12].
 - Non-parametric model for modeling very sparse user-item relations.
 - Impact: improved state-of-the-art models by 9%-12% on the quality of recommending less frequent items for online shopping.
- Web search and online advertising [C16,C17,C18,C19,C20,C21]
 - Learning from massive search & ads click logs to improve ranking quality.
 - Impact: currently in production as a part of Microsoft Bing.

Distributed computing

- Distributed algorithms for machine learning [J6,J7,C7,C8,C14,C15].
 - Communication-efficient algorithms for distributed machine learning on large clusters.
 - Impact: guarantee the best possible accuracy and the least possible computation/communication.
- Fundamental theory of distributed computing [C11,C13,M2].
 - Understanding the fundamental trade-offs between communication, computation and statistical accuracy on any distributed system.
 - Impact: seminal papers on the study of communication complexity of distributed statistical estimation.
- Programming interface for parallelizing stochastic algorithms [M1].
 - A user-friendly framework for parallelizing online algorithms on Spark.
 - Impact: component of Berkeley Data Analytics Stack (BDAS), 80+ Github stars.

Other projects

- Theoretical statistics [J3,J4,J2].
- Theoretical computer science [J8,C22].

Teaching

Graduate Student Instructor, Introduction to machine learning, UC Berkeley

Spring, 2015

Graduate Student Instructor, Randomized algorithms for matrices and data, UC Berkeley

Fall, 2013

Service

Journal Reviewer: Journal of Machine Learning Research, Annals of Statistics, Mathematical Programming, ACM Transactions on the Web.

Conference Reviewer: ICML (2013 -), NIPS (2013 -), AISTAT (2015 -), IJCAI (2015 -).

Programming

Capable of Python, C/C++, C#, Java, Scala, MATLAB.
